

04/16/2008

This image shows a highly detailed aluminum intake manifold assembly. On the left, a carburetor is mounted to a throttle body. The manifold itself is a dual-carburetor design with a prominent, ribbed plenum at the rear. It is mounted to a horizontal metal rail. The entire assembly is set against a dark, wrinkled tarp background. A yellow date stamp '04/16/2008' is visible in the lower right corner.
