Default Navigation Select

Users can choose preferred installed navigation application as default navi. And then go "Setting"- "Automobile setting"- "navigation settings"-choose the default navigation app. (Then reboot after selection.)

GPS Satellite for Location

The advent of GPS navigation has brought great convenience to driving. Users can get to your destination quickly and efficiently according to GPS location and e-map guidance. Both GPS and navigation map are indispensable for accurate navigation. GPS needs accurate location and fast operation speed; navigation map needs large and exact data and good capability of route planning.

Navigation Map Data

The navigation map data can be copied into internal storage card(sdcard). Make sure to leave enough internal storage space before copy. Please delete unnecessary data if remain storage is little. Some navigation applications also supports data is in an external sdcard or usb sticks.

Attention: Some navigation app will specify the path of the map data. Putting the map data in external sdcards or usb sticks are not supportable.

APK Installation of Navigation Application

Navigation APK should be installed before using. Please install the map application apk rightly.

Start Navigation

A corresponding icon will be shown at the menu after navigation apk installation. Click the icon to start navigation.

The user can click "Automobile Settings->Navigation Settings->Navigation App selection", which can associate the navigation buttons with navigation application. User can start navigation by press the button directly after that.

Navigation Application Using

Please find specific navigation application instructions.

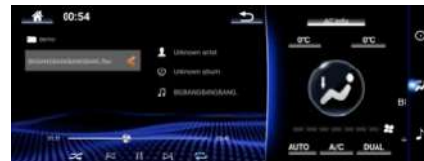

Audio Playback

This device supports mp3, ape, flac and other lossless formats, which brings users enjoyment of perfect sound quality.

Folders and lists

The device will auto-scan and show files name and songs after recognising a usb device. Users can choose whichever to play accordingly, Repetition and radamization.

Click "🔄", to switch repetition mode: repeat current song→repeat current file→repeat all tracks. Click "🎲", to switch to choose track random mode on or off.

Display Screen Usage

Tips to last longer time usage

1. Attention

Avoid long time direct sun or high temperature or it will lead to malfunction. Avoid direct sunlight to the screen when not using it.

Please use the device within the following temperature: -10°C to 50°C.

Please know the storage temperature: -20°C to 80°C.

Do not press hard on the screen or it may cause malfunction and influence display showing performance in car. Please gently press the screen except for the situation to make touching adjustment.

Do not influence work of safety emergency guard like air bag in car.

2. About LCD Display

Please know that it is normal if there are some spot light or black spots, which is normal for LCD screen display.

It may be a bit dimmer when power on in cold days. It will turn to normal brightness after a while.

Sunlight reflection will influence views on display.

3. About Storage and Care

Power off to clean the dirt on the screen. Use soft cloth to clean and avoid any scratches by nails.

Do not use wet cloth or any volatile chemicals like essential oils or detergent to clean.

GPS Placement

GPS Antenna can be placed inside the car, for instance, car dashboard; or be placed outside the car, such as car roof. GPS antenna must be fixed at a wide place. It may not receive good signal if any explosion-proof membrane is used in car.

So it is suggested to fix antenna outside car.

Steps to fix GPS antenna:

Clean the place where GPS antenna will be fixed; Remove the sticker on the back of GPS antenna, then put it to the right place and press hard.

Take off the cover, let the wire go through glove box to car console head unit. Please make car wire and the wire in a bundle by a cable tie.

Connect GPS antenna with head unit.

Notice

Make sure radio is powered off before connecting GPS antenna.

Do not modify length like shorten or lengthen GPS antenna, which may cause malfunction. Put GPS antenna to a horizontal place, otherwise it will lead to location inaccuracy. Do not wind or make it influence steering wheel control or gear shift to avoid any danger.

Guide to solve common issue

Here's the guide to deal with problems by yourself if any occurs.

Please contact and ask for advice from expertise or seller when encounter any problem.

Do not disassemble the unit without guidance to avoid bad consequences.
