[TOYOTA](#) > [Lexus / LEXUS IS 250 · 350 · F](#)[\[Select car manufacturer \]](#) [\[Return to top page \]](#)**Vehicle information**

Car maker	TOYOTA / Toyota
Car name	Lexus / LEXUS IS 250 · 350 · F
Model year	2005/09 --2013/08
Model	GSE · USE 20,21
Remarks	(Caution) It can only be attached to the seats listed in the matching information below. 2WD car. Includes side airbag canceller. Cannot be installed on vehicles equipped with a pre-crash safety system. The passenger seat of a car with position memory needs to be relocated. IS250C (convertible car) cannot be installed. The product number has been changed since September 2015.
Notices	The side airbag function with a built-in genuine seat will be lost. The airbag warning light needs to be turned off. The seating position is almost the same as the genuine seat (when using the New LX-F). Seat offset Door side approx. 10mm (RECARO is closer to the door side). The amount of forward slide is reduced by about 20 mm compared to the genuine product. It is necessary to relocate the driver's seat position sensor. When the RECARO seat is attached to the passenger seat, the occupant detection sensor will not function and the warning light on the seat belt will not light up. Vehicles equipped with the manufacturer option "Mark Levinson" premium sound system have not been confirmed.
position	New structure frame. 3 heights can be selected (Some models require the legs of the slide rail to be cut depending on the mounting position, please make a temporary adjustment before mounting.)

Base frame information

	For the left seat	For right seat
Product part number	2080.009.1	2080.009.2
Price (tax included)	22000 yen	22000 yen
When making inquiries or ordering, please specify the above product number.		

Notes

SR-1 and 2 interfere with the shoulder and B pillar by about 10 to 15 mm. The shoulder part of A-8 interferes with the B pillar by about 5 to 10 mm. SP- # and racer require SP-G offset adapter set (6600 yen <product number 1600094J>). If you are concerned about the steering wheel offset from the seating height, the RS / TS- # system has an offset adapter set for RS / TS-G (7700 yen <product number 1700001J>), and the steering wheel offset is 5 mm in 5 mm increments to a maximum of 15 mm. It can be adjusted in the range. (When installing, please consult your dealer regarding interference with the console side (shift, etc.)) Adjust the RMS to the optimum position with the separately sold side adapter for RMS (front-back height, left-right offset 0/5/10 mm). Please install. Also, if there is interference with the interior, it can be alleviated by adjustment. Adjust the RCS to the optimum position (front-back height, left-right offset 0/5/10 mm) with the separately sold RCS side adapter.
