F-SPORT SWAY BAR SET FOR IS250 AWD

2-27-2009

Bulletin ACCY 2009-11

Page 1 of 1

Help your customer add some excitement to their IS250 AWD with the addition of F-Sport Sway Bars. These parts have been developed and tuned by the F-Sport team on actual race tracks to deliver measurable performance improvements over the OE components.

This set includes a pair of larger diameter replacement front and rear sway bars that offer reduced body roll and flatter cornering. Stiffer, oil impregnated rubber bushings are also included to replace the original bushings and maintain a quiet ride. The bars are powder coated in F-Sport Blue for corrosion resistance and visual impact. All necessary hardware is included for a painless, bolt on installation without any modifications needed.

Specification	Front	Rear
