Title: **ALTERNATIVE FRONT BRAKE PADS**
Models: '06 – '07 GS 430 & IS 350 & '07 GS 350/450h

REVISED
BR002-06
BRAKES

TSIB REVISION NOTICE:

- January 19, 2007: 2006 – 2007 model year IS 350 and 2007 model year GS 350/430/450h vehicles have been added to Applicable Vehicles and the Warranty Information table.

Previous versions of this TSIB should be discarded.

Introduction Some Lexus vehicles are equipped with high-friction front brake pads, specifically designed for superior braking performance and response. As a result, under certain conditions, it is possible for the customer to experience a larger volume of brake dust on the wheels.

For customers who find these characteristics objectionable, an alternative brake pad material has been developed. As with any change made to brake pad material, braking performance and feeling may be altered and could possibly be reduced under certain driving conditions as a result of their usage.

These alternative front brake pads have now been made available as service parts.

- Applicable Vehicles**
- 2006 – 2007 model year **GS 430** and **IS 350** vehicles.
 - 2007 model year **GS 350** and **GS 450h** vehicles.
